Private Master's Degree in International Construction Management MBA

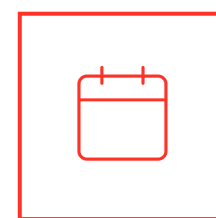

It's the only specialised MBA in the construction sector, aimed at engineers and architects. It's focused on managerial skills and competencies and business administration.

If you're an architect or an engineer, then specialise with this MBA focused on the construction sector.

Gain managerial skills and competencies and learn to use business administration tools that will prepare you to lead companies in a globalised market. The master's features a complete module on international markets and offers the opportunity to do top-level internships in Spain and Latin America with companies like ACS, FCC and Sacyr.

Why study for a

Private Master's Degree in International Construction Management MBA

Number one

in urban development master's degrees according to El Mundo, recognised by most companies in the sector and highly valued on the European and Latin American markets.

Practical methodology

based on solving real-life cases in the classroom alongside a faculty of professors and senior executives from domestic and international companies such as Sacyr, Cobra, Intecsa, Gas Natural Fenosa, Schindler and FCC, who will provide their experienced vision of the market.

Apply everything you learn

You'll apply everything you learn on internships at companies the university has signed agreements with, including ACS, OHL, Cobra, Acciona, Bovis, Editec, A-cero, Detecsa, Ferrovial, Icinclam, Larcovi and Sumcoser. You'll also have the option to do an internship abroad (Internship assignment follows a selection process. See the "External academic internships regulation").

Full module on international markets.

Faculty comprised of acting professionals in executive positions at companies such as: FCC, ACS, Sacyr.
